

第05回

- 講演者: **Carla Farsi** 氏 (University of Colorado at Boulder)
 - 題目: Soft C^* -Algebras
 - 日時: 8月2日(金) 16:30 ~ 17:30
 - 場所: 数学科セミナー室 4号館 3階

We will first define soft group C^* -algebras and crossed products. Then we will describe how to prove that soft crossed product C^* -algebras are isomorphic to classical crossed product C^* -algebras. If time allows we will also show how a large class of these soft C^* -algebras have stable rank equal to infinity.
