第13回

- 講演者： **佐藤 好久** 氏 (九州工業大学)
  - 題目：The geography of symplectic \(4\)-manifolds and Lefschetz fibrations
  - 日時：平成 25年 1月 24日（木）16：30〜17：30

First I explain the geography of complex surfaces and one of symplectic \(4\)-manifolds and consider the relationship between them.

As the main results in this talk, I present the geography of Lefschetz fibrations/pencils, which are the important object when we study the topology of symplectic \(4\)-manifolds.
