

第15回

- 講演者 : **Karl Dilcher** 氏 (Dalhousie 大学)
 - 題目: Wieferich primes and Fermat numbers: Computations and generalizations
 - 日時: 平成 16年 11月 30日(火) 14:40 ∼ 15:40
 - 場所: 数学科セミナー室 4号館 3階

In this survey of recent computational and theoretical work I will report on the following interrelated topics:

- (1) computational efforts to find new [Wieferich](#) and [Wilson primes](#),
- (2) theoretical and computational results on Fermat and Wilson quotients for composite moduli,
- (3) the search for new factors of Fermat numbers, and
- (4) factors of generalized Fermat numbers.

The talk is partly based on various joint work with T. Agoh, R. Brent, R. Crandall, C. van Halewyn, C. Pomerance, and L. Skula.
