

## 第13回

- 講演者：佐藤 好久 氏 (九州工業大学)
  - 題目 The geography of symplectic  $(4)$ -manifolds and Lefschetz fibrations
  - 日時：平成 25年 1月 24日 (木) 16 : 30 ~ 17 : 30

First I explain the geography of complex surfaces and one of symplectic  $(4)$ -manifolds and consider the relationship between them.

As the main results in this talk, I present the geography of Lefschetz fibrations/pencils, which are the important object when we study the topology of symplectic  $(4)$ -manifolds.
